

Camden County 4-H Prepares Youth for a Bright Future

What is 4-H?

4-H is America's oldest and largest youth development organization. Founded in 1902, 4-H is delivered through the Cooperative Extension system – a community of more than 100 public universities across the nation – and **boasts 6 million members nationwide.** 4-H offers youth in kindergarten through one year out of high school (K-13) the opportunity to join a project-based club where they gain leadership and life skills to master their projects, in such areas as science, engineering and technology, citizenship, and healthy living. With guidance from adult volunteers and county 4-H staff, youth are encouraged to set goals, try new things, and take on proactive leadership roles.

Cooperative Extension is a unique collaboration between Rutgers, The State University, the Camden County Board of Commissioners, and the United States Department of Agriculture. As the community outreach arm of the University, our goal is to help the diverse population of Camden County adapt to a rapidly changing society and improve lives and communities through educational programs that are science based.

Impact of the 4-H Program

Grounded in a research-backed approach to positive youth development, 4-H aims to evaluate the impact of 4-H programs and better understand how young people experience the world.

The unique hands-on approach that 4-H provides gives youth the opportunity to learn by doing and build life skills as they prepare for the future, no matter their career goal (National 4-H Council, 2019).
